

Safety Branch (QSA)

The Safety Branch provides services that ensure a safe workplace for all Center operations while ensuring all Agency requirements are met. The Safety Branch develops, implements, and maintains safety program compliance with all applicable regulatory requirements. The Safety Program assesses the risks of Glenn Research Center activities and operations, and informs cognizant management of those risks and the recommended actions developed to mitigate them. In addition, the Branch is the Center lead for the implementation of the Agency Safety Initiative and the Voluntary Protection Program.
